

Digital Parking Permit System

- Marxabxon Lutfiddinova
- SER216

Requirements:

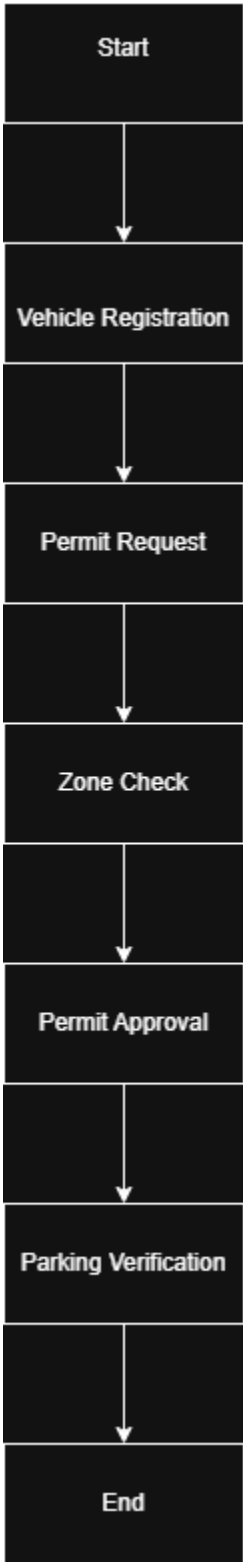

1. Functional requirements:

- Users(students/staff) must be able to register their vehicles
- Users must be able to request a permit
- The system must display available parking zones
- Security staff must verify permits and record violations.

2. Non-Functional Requirements:

- System response time must be within 2 seconds
- System must securely store user data
